Introduction

My 11-month-old-Irish-Twins-obnoxious-but-sweet brother calls me *The neurotic structopath*.

And for lack of a better word that might be the case indeed... So, he is right in something after all 😊

My quest for digital, later online, productivity probably started when I got access to FileMaker 2 on our first Apple Macintosh. By the way one of the first Macs to be introduced in the Netherlands. And that while my father had worked half his life for IBM at that time, and continued to work there for many years after this as well.

Olaf and Zoran, 4 and 5...

But even at the age of 8 I already had this (some might call it obsessive) need to do things efficiently and fast. But at the same time, I am a perfectionist so it should not hurt the high quality I want(ed) to deliver.

I already had discovered that there are only 24 hours in a day, so time is limited. Therefore, I discovered, if you want to get more done in the same number of hours, you will have to leverage yourself.

My solution: Tools!

How it all started

I don't like to talk about myself, but in this case, I think I have to explain a little where my passion and quest to become an entrepreneur come from.

Soccer pool 1996

I know you guys in The US think soccer is a women's game, but never mind.

The reason that I mention it, is because in that year and age, before email or online sports pools, I managed to whip something up on my laptop.

And as you can see, it looked pretty professional, to me at least.

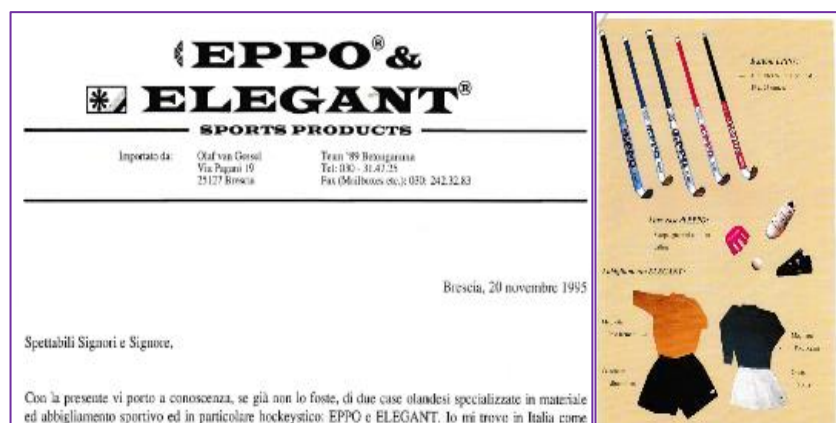

Too bad finished last though ☹️

Business

In Italy I "worked" as a professional field hockey player. Even worse than soccer, right?!

And although I had some jobs at high school and during my time as a student, it was there where I started my first real business.

This venture was a mail order catalogue of field hockey products, like shirts and sticks. Those were the days. We are still talking 1995-1996, so no email or internet, just regular mail.

"Sales Letter" + catalogue 1995

And it was just like this: find all the clubs in the whole of Italy and regular mail (again, no email yet) their secretaries.

Since I was sponsored by a brand in the Netherlands, I resold all their products to these clubs and of course within my own club as well.

Good fun, with the benefit of making some extra cash on the side.

Internet

Another example was my need to categorize internet pages. Before the search engines even existed or worked properly, I had my own *Search Engine* so to speak in the shape of starting page lists existing of bookmarked pages.

Of course, categorized by interest and 5 layers deep 🧐

So maybe I also was ahead of Google in those days 🧐

Later on, I developed a *What To Bring On Vacation List* that I still use today.

Obviously, categorized with neat little tick boxes.

Very handy indeed!

Get serious, Olaf! The Corporate World

After that I had to return to find a more responsible "normal job", so I entered the corporate world so to speak.

First off as an all-round IT-specialist where I learned about software development, databases etc. Boring stuff, but good to know!

Second off I was recruited as junior account manager in call center software. So again in tools and systems!

Olaf's first sales job (watch that monitor...)

And from that moment on I have always been in the world of (mainly software) marketing and sales.

Started as a junior account manager, all the way “up” to the board of directors of a software company 

Of course, responsible for marketing and sales.

But I always felt the need to be an entrepreneur, much more than working for somebody else or working in a corporate environment.

That's why I also always had multiple businesses or business plans on the side.

And that's why I left the last business I was in as well. And with becoming an entrepreneur again I also said goodbye to my 6-figure income. And my wife quit her job at the same time because we left for another part of the Netherlands to try our luck.

Oops. Talking about burning one's bridges.

Now there was no way back, the only way is up!

Olaf's businesses (selection)

That said, you see I also did have a couple normal jobs.

Sales Manager

Chief Commercial Officer

But always with entrepreneurial jobs on the side or as a main business.

Such as, in order of appearance 😊

- Mail order business
- TV-show about golf "*Hole in one*"
- Automated driving range
- Italian ties and sandwiches
- Frozen yoghurt franchising
- Developing frozen yoghurt powder mix for machines
- Vinyl records selling
- Interim health care management and services
- Houseboat Bed and Breakfast in Amsterdam
- Google search engine specialist
- Instagram growth hack
- SEO-agency
- Marketing agency
- Funniest animals affiliate website
- Sneaker comparison websites (and a lot more affiliate websites)
- Hair fibers sales funnel

Businesses (selection). Clockwise: Golf Show, Frozen Yoghurt, Frozen Yoghurt Mix, Funniest Animals Website

And that while I always wanted to be a Formula 1 Driver or a DJ!

B&B Amsterdam: Airbnb before it existed

Bed and Breakfast

The B&B in Amsterdam I talked about was in our houseboat while we lived next “boat”. I started this to support ourselves during the startup of my actual business: the Italian frozen yogurt franchise chain, called Yoyogurt.

But both of these businesses meant I would have to know about a couple of very important things, as it turned out to be:

- creating a website
- getting the website on the Internet
- getting the website to be found by means of SEO and Google AdWords

And you must realize that at that time Google just started, and there was no such thing as air Airbnb or WordPress...

Some books on this topic

Which was good for me, because that way I had to develop the necessary skills to get this business to work. And that skills still benefit me today.

Do More

In all my businesses, whether as an employee or as a self-employed entrepreneur, I have always been looking for ways to do things smarter, better, and more efficient.

That is why over the past 30 years -and counting- I have gained a lot of experience (earned) and knowledge (learned) about all kinds of tools that can increase your productivity or improve your sales.

And if you know me a little -by now you should- you will understand that I don't take the first tool and run with it. I will investigate thoroughly and will at least test 3 or 4 of tools against each other for a long period and scrutinize whatever there is to be found!

Why Tools

Well obviously, if you want to become more productive, there are more ways that lead to Rome. As we say in Holland.

What I found though is that of course you could concentrate on your mentality, your work ethic, working harder, working more hours, or similar things that will improve your productivity.

But this is **hard to do for people** and will give you only **minor improvements**. Because still there are only 24 hours in one day.

The right tools however will improve your productivity enormously. And this without having to change your whole attitude or being. Which is not the same as saying that a healthy work ethic and knowing your direction, will not benefit you considerably as well ☹️

Who is this guide for

The tools I will be talking about range from regular tools you would need in any office to a lot of more specialized ones for making money online. In less time and with less effort.

And if you are already making money online or offline, these tools can help you **make more money faster**.

If you are working for a boss, these tools will still help you a great deal. Because they will shave hours of every day, so less stress there.

Or on the flipside: you could get a lot more things done, which will make you stand out from your co-workers.

If you work more than 1 hour a day on a computer, you will benefit.

Today

After we've moved to a quieter village in 2015, me and my wife both have been self-employed again.

She's currently crushing it in the world of dogs, and I am working hard to do the same in internet marketing.

Our backyard

Come to think of it, I could already have been a millionaire or billionaire a couple of times. If only I had pursued my ventures in Internet searching, bed and breakfasts or offering endless streaming music... 😊

Anyhow, I hope you will enjoy my guide and that you may find a lot of tools that will **fast forward your business!**

Good luck 🍀

Olaf

My workspace today

GET
SHIT
DONE.

How To Use This Guide

My name is Olaf, and I am a full-time online entrepreneur from The Netherlands. I've lived for 30 years in Amsterdam, but now my wife and I have moved to a quieter place in the countryside with our cats and dogs.

As you have seen in the introduction, I have been passionate about processes and efficiency almost since the day I was born. Everything I do always can be done faster or more efficiently...

During high school, university, corporate jobs, numerous ventures, and in my current profession as a self-employed online entrepreneur, I am always on the hunt for opportunities to do things faster and better. So you don't have to!

Hence my passion (some say it's more of an obsession) for tools to

GET MORE SH*T DONE IN LESS TIME

And I must say I am really thrilled that you are reading my guide!

The mere fact that you are putting in the time means you are serious about ramping up your business. This guide will help you a lot with that for sure.

In fact: everybody that is behind a computer for more than an hour per day will benefit hugely from these tools, tips and tricks.

How to use

On every tool page, you see a description, a couple of links, and the feature that I like best. On the second page of each tool, you will find a couple of screenshots of the product at hand and reviews.

Whenever you are interested in knowing more about the specific productivity tool, you can either get started right away or follow my tutorial first through the links provided at the left of the page.

Logical structure

This guide is structured in terms of possible number of users. So it starts with the low hanging fruit almost everybody will use (.i.e. operating systems) and ends with the more specialized tools for specific purposes.

I trust these tools will help you as much as they help me every day. Have fun and remember: **WORK SMARTER, NOT HARDER!**

Well, I hope my OCD will help you with whatever you are doing on your computer. Use my tips and you too will get a lot more done for sure!

Enjoy!

Olaf

COPY PASTE TOOL SAVES TIME AND MONEY

Every day you must copy & paste a lot of stuff when you are an (online) entrepreneur like me. And many times, you already copied it some time ago. Am I right?

Looking up these items (again and again) costs you a lot of time & therefore MONEY. And this when you already know you will need this info repeatedly. **Enter Ditto!**

Ditto automatically stores an unlimited number of items. Text snippets, including rich text, images, and other copied files:

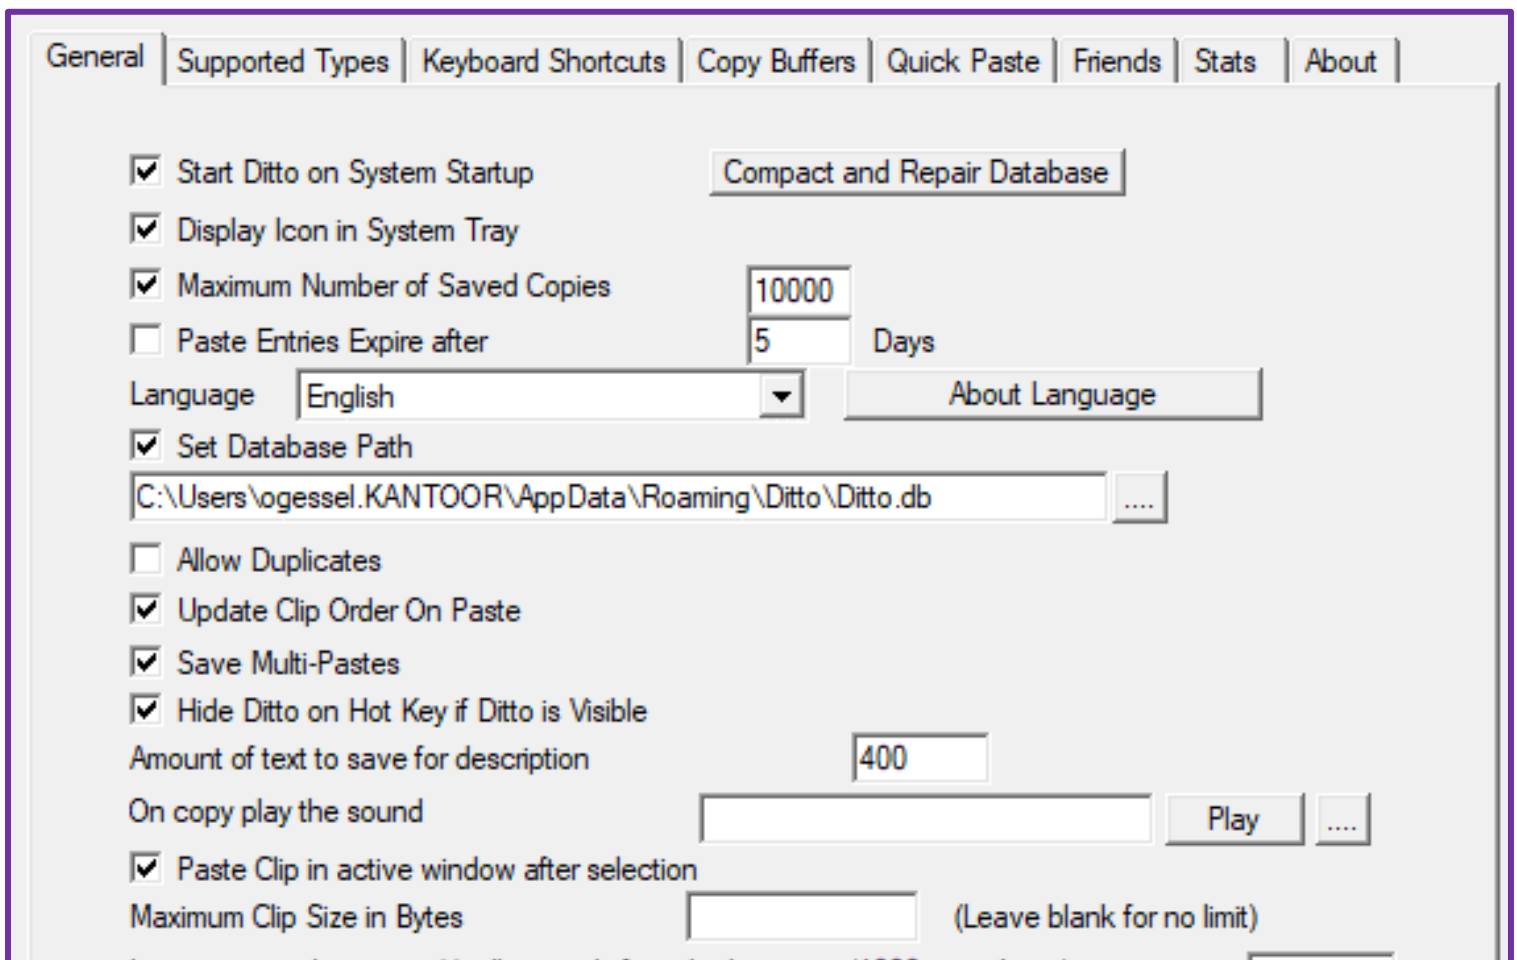

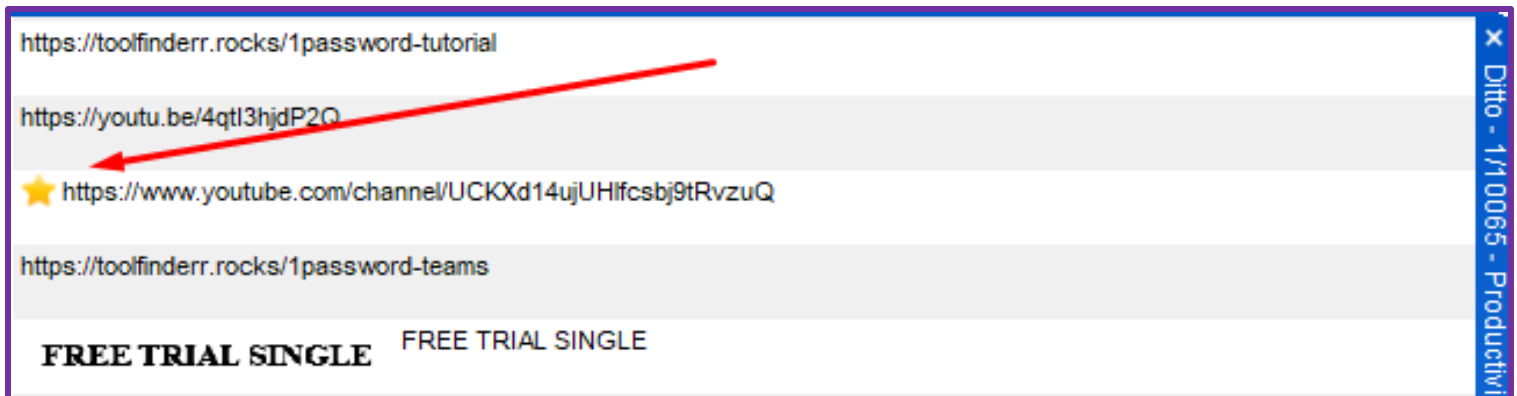

- Snippets of (developer) code
- FAQ’s
- Bank Account Numbers
- VAT Numbers
- Copyright Icons
- Other Special Characters
- Website Addresses
- Your Home Address

Brilliant! This is the tool that you should start using now.

Like [IrfanView](#), this tool is a little daunting initially, to say the least... The number of options and possibilities is endless.

But don't let it scare you, because BULK RENAME can save you a LOT OF TIME.

Especially when you are in SEO, or just want your images to be better found in Google. Then you know that the filename IS important!

With this tool, renaming a bunch of files is a breeze. That is once you get the hang of it.

Example use cases renaming:

- Phone Images (DCIM to something meaningful)
- For SEO

If you are like me, chances are you don't backup often enough.

Am I right?

And if you **do** make a backup, the process is very time-consuming and a hassle to get it right. It will take you at least 1 hour every week or so to get the right files and documents backed up.

That's why since a couple of years now I do not ever back up again! And I don't have to save anything again either. How nice!

This is a great and very affordable tool (around 5 dollars per month at the time of writing) to **be more productive and have very cheap time tracking.**

I use it for two main purposes:

1. **Pomodoro timer to keep focused**
2. **Time tracker for client-related activities**

Focus Booster gives you insight into what you've spent your time on and helps you overcome distractions.

Your Pomodoro sessions are automatically recorded, so you can review your output to improve productivity or track client work.

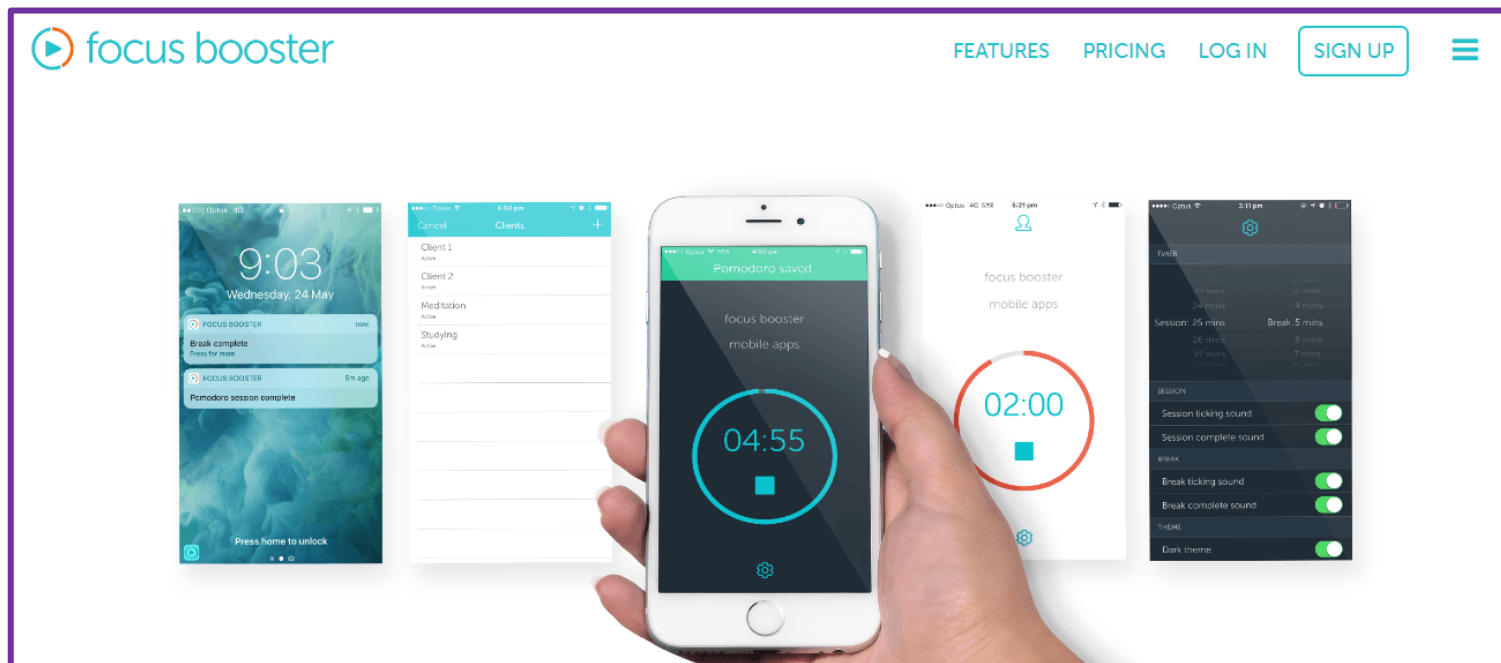

This last feature alone saves me quite some time. No more manual recording, checking for appointments in your calendar to see how much time you spent, etc. Awesome time saver!

Online, Windows, Mac, and mobile.

ABOUT

If you are in online marketing or affiliate marketing, you probably will have made a video or two. And you also make loads of screenshots to share with your followers, am I right?

Many times, at least in my experience, you will have to share some screens that contain sensitive or private information.

What I used to do was changing the video or images with video or image editors.

But that takes a lot of time!

That's why I'm pretty stoked with BlurPage, a Chrome extension that makes life a lot easier and makes hiding things much faster.

ABOUT

Online Jobs PH is the best place for Virtual Assistants for me.

Based in the Philippines, the marketplace has been around for ages. And that's saying something in this line of business.

Finding new virtual employees in 3 steps

1. Post a job or search resumes
2. Find the perfect staff member
3. Hire and manage

That's all there is to it. Of course, finding the right worker or VA (Virtual Assistant) will take some time. Just like finding normal employees would, but then much quicker, easier, and cheaper.

For a decent VA, you'd pay around 3-5 USD per hour. Yes, you read that right. Three to five dollars per hour! And the best part is that they get your work done while you sleep. Wow!

I am using them for general VA's, WordPress development, product research for Shopify, blog posting, content etc.

So, if you need a cheap and reliable VA, start here!

If you are involved in lots of work projects or if you are self-employed, efficient project management is critical.

Trello can be used for any project. Get rid of all your individual action items lists.

One place for all your projects. Doesn't matter if it's your solo project or a project with 100 people...

I use it a lot for single projects to manage my own progress, but also for multidisciplinary teams and to keep control over projects with Virtual Assistants.

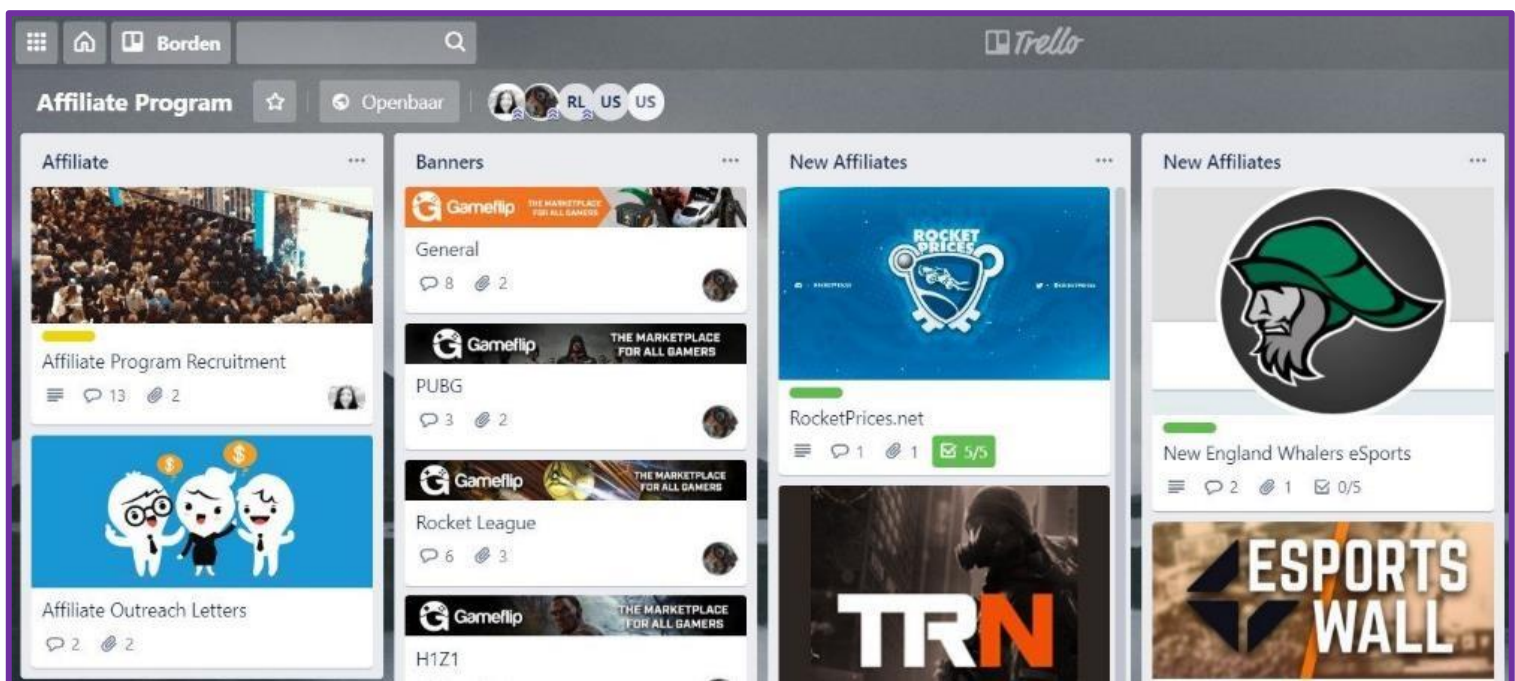

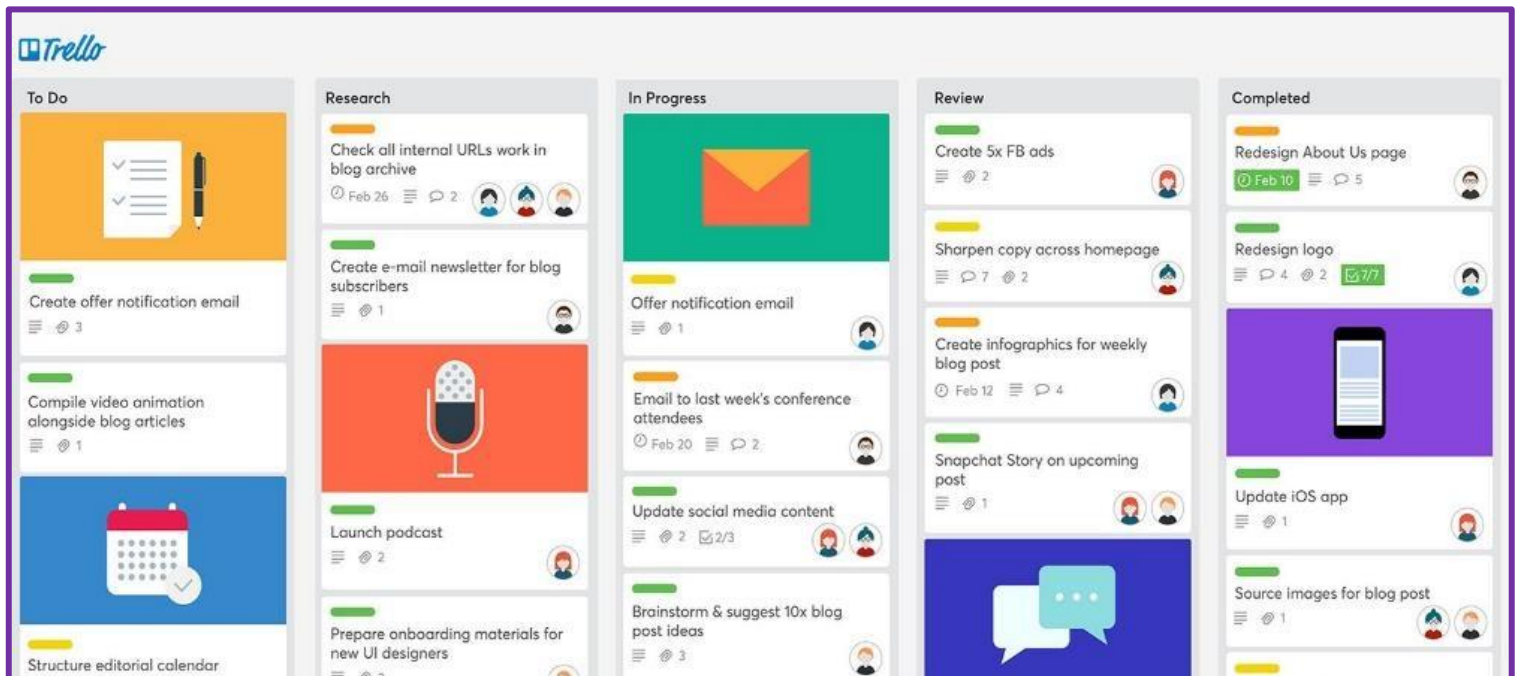

Sure, it's a Freemium model but the Free version will get you a long way!

Granted, ClickFunnels is not the cheapest piece of software in the world, ranging from 97 to 297 dollars per month. But boy, is it worth it! It will make you loads of money and save a lot of time in the process.

I have used several tools to build marketing and sales funnels over the years. And I keep using ClickFunnels as the one and only. Why?

It's because of the ease-of-use, the beautiful landing pages, and last but not least the amazing conversion rates.

ClickFunnels should be used for selling online products that you don't need a shop for:

Max 3 products, e-books, videos, or memberships work fine!

ABOUT

Funnel Scripts was created by Jim Edwards and Russell Brunson to support all the scripts that can be used within ClickFunnels.

But in the meantime, it has evolved into so much more. With Funnel Scripts you can easily create all the sales copy you like. Ranging from Facebook Ads to video sales letters to automated webinars to one-time offers. You name it and it's there.

You can use Funnel Scripts to get all your scripts written in under 10 minutes without hiring an expensive copywriter.

It works even if you hate writing and never want to know anything about copywriting. Just answer some questions and you're done.

I use it for:

- video sales letters
- email scripts
- Facebook Ads
- meaningful bullets
- killer headlines

ActiveCampaign or Wild Mail | Email Marketing

MANAGE CONTACTS AND SEND EMAILS WITHOUT HASSLE

ABOUT

The money is in the list.

You may have heard this before about email marketing. It means that the real money is not made by affiliate marketing, nor by dropshipping or anything else.

The real money is in your email list. That's why ActiveCampaign (AC) is such a lifesaver. With AC it is very easy to segment, filter, and specify exactly who is going to get which email from you.

And creating a flow or multiple flows (email sequences) is a breeze.

Of course, like any other tool, it takes some time to get used to. But once you get the hang of it, AC is the most versatile and extensive email marketing tool there is.

An even better option would be to choose Wild Mail. This is ActiveCampaign, but then offered by a partner that offers free templates and ROI-reporting to make the software even better.

You just get more features and better support for less!

We have been using Wild Mail for years now and we still see new possibilities. Check the [WHY WILD MAIL?](#) link for the differences and bonuses why you choose Wild Mail over regular AC.

Thrive Leads | Email List Building

ULTIMATE LIST BUILDING PLUGIN FOR WORDPRESS

ABOUT

FAVORITE FEATURE

Thrive Leads has all types of opt-in forms available. Therefore, also a lot of non-obtrusive ones that I like to use. Like the ribbon.

Besides that, I like the powerful A/B testing and the advanced targeting.

And you can buy a flat fee site license which makes Thrive a bargain.

If the money is in the list, as we have seen on the previous pages, how on earth are you going to build that list?

Well, we all know that for this you need opt-in forms and of course something good to give away, the so-called lead magnet.

And if you have created your lead magnet, then how are you going to get people to subscribe to your email list?

To overcome this, lots of people that have WordPress websites choose Thrive Leads as their favorite opt-in plugin.

With Thrive it's very easy and intuitive to build your opt-in pages and link them to your favorite autoresponder software.

Check out my Tutorial and the Get Started links and list building via opt-in pages will no longer frighten you.

ABOUT

Building an email list is crucial, as we have seen previously. So how do we go about it?

You can use smart opt-in software like Thrive, but still you would have to create a awesome lead magnet and run a lot of ads to get your list going. This can get very expensive very quickly.

A smarter option is to use UpViral

UpViral is a brilliant system that gives you another way to gather lots of people for your email list. By referral (think Dropbox).

Through contests and/or giveaways it's easily possible to get thousands of new subscribers to your email list and you just have to spend a couple of hundred dollars to do so.

In UpViral there are [many examples and case studies](#) on how you can achieve this. And with the intuitive interface it's easy to setup, use and manage. Now just let your email list grow on steroids, and you will be very glad that you gave UpViral a shot.

This is my #1 in terms of best ROI on email subscribers

TYPE: EMAIL LIST BUILDER

PRICING: PAID

DIFFICULTY: ★★☆☆☆

How does it work?

1

A visitor enters email address on your lead page

2

They get a unique link to promote your campaign

Unique tracking links are used to reward users. For example, "Get 5 people to subscribe to get access to X".

3

They can unlock rewards or win prizes by referring their friends.

Users can now unlock rewards or increase their chances of winning a sweepstake by getting their friends to sign

The screenshot shows the UpViral dashboard. At the top, there's a navigation bar with 'Dashboard', 'Settings', 'Learning Center', and 'Support'. The main content area features a large video player titled 'Case Study Interview with Gabe Schillinger'. The video thumbnail has the text 'INTERVIEW ON HOW GABE SCHILLINGER GOT 40K LEADS & 200K SALES'. To the right of the video player is a sidebar titled 'Gabe Schillinger Case Study' which lists various other case studies like 'TweetLead Case Study', 'Stacked Marketer Case Study', etc. A red arrow points from the video player to the sidebar. Below the video player, there's a section titled 'Gabe Schillinger Case Study' with a thumbnail for 'Review of Gabe Schillinger's Campaign'.

This block shows the UpViral product information and reviews. On the left is the UpViral logo. To the right, it says 'UpViral' with a heart icon, followed by a 5-star rating (4 stars are filled, 1 is empty) and '1 review'. Below this, there are two tabs: 'Product Information' and 'Reviews'.

The background is a neutral, textured surface.

When building a website, you need to create a lot of posts and pages. Especially in the beginning, this is a lot of work.

The great news, however, is that with this plugin you can duplicate posts and pages easily. So, when you are happy with a page or post in terms of design, layout, Yoast, etc. you can use it as a template with just 1 click.

This means building the rest of your WordPress website will go a lot faster.

Apart from posts and pages, you can also use this to duplicate other items. For example, custom post types or commonly used items like clients, projects, testimonials, or whatever else you have in your WordPress setup.

This is a great timesaver when building a new WP website.

You wish you had discovered this plugin earlier!

Broken Link Checker | Links Management

CHECKS ALL YOUR INTERNAL AND EXTERNAL LINKS

ABOUT

This clever little WordPress plugin is also a huge time saver.

If you have a WordPress website, you know how important it is to have no 404's. Not only will you lose dwell time because your visitors will exit your page when links don't work, but you will also lose SEO-points if you have too many 404-errors.

So, you need an automated tool to check for broken links occasionally. Because manually is such a drag and frankly undoable if you manage multiple WordPress websites.

Install this plugin and you don't have to worry about this ever again. Easy-peasy.

Some of the features

- Monitors links and images in your posts, ages, etc.
- Notifies you either via dashboard or email
- Makes broken links display differently in posts
- Prevents search engines from following broken links

FAVORITE FEATURE

Automatically redirect non-working links to any page you like.

Of course, you will get a message, but your site will always work!

Toolbar Publish Button | Updating Made Easy

WORDPRESS UPDATE BUTTONS ALWAYS VISIBLE

ABOUT

FAVORITE FEATURE

The fact that it works on all WordPress-items in the backend.

So e.g. settings, users, the editor, menus, etc.

So, you always know that you can update something in the admin bar above.

Very convenient!

LINKS

[GET STARTED](#)

[TUTORIAL](#)

Too often I needed to scroll through WordPress pages and posts back and forth in the quest for the big blue button to save my latest changes.

With this plugin, the Update button is copied to the admin bar so that it stays clickable wherever you are on the page.

It works on all types of items in the WP admin area.

The plugin does not affect any native WordPress functionality, it just redirects your click to the original button, and uses the current button text, of course, with the current language.

Features

- keep the scrollbar position after saving
- choose which buttons to show (e.g. preview yes/no)
- set background color for the save-buttons to highlight them

Hide WP Toolbar | Admin Toolbar Hide

SHOW OR HIDE THE ADMIN TOOLBAR

ABOUT

In some cases when you are working on WordPress websites you want the frontend to show just like your visitors see it.

But you also want to be able to go to the backend to edit a page or a post. That's why WordPress has the admin toolbar in place that shows above every post or page.

But what if e.g. you have a top menu and the admin toolbar is blocking the view?

Then you just install this plugin, and you are home free.

Easily hide or show the front-end admin toolbar with one click.

The plugin adds a special button to the right side of the WordPress Admin Toolbar that only displays when you are outside the admin area of WordPress on the front-end.

Clicking it will make the admin bar slide off the page to the top left corner, leaving only the hide/show button visible. Clicking the button again will restore the Toolbar to its original position.

That's all there is to it.

WP Rollback | Version Control

VERSION CONTROL OF THEMES AND PLUGINS

ABOUT

It is important to keep your WordPress website up to date because of the functionality and security of the website.

But every now and then it may be that an update causes problems with the functionality. Then you better wait a while before performing that specific update.

But how do you undo your updates?

Fortunately, there is a simple plugin for this: WP Rollback

Especially when you are developing/running multiple WordPress websites, it can be a big hassle and a very time-consuming task to figure out which plugins are responsible for the problems you are having.

But the plugin also works for themes. So, when you have updated your theme and you see strange things happening on your site, you can rollback with the click of a button.

How cool is that?

ABOUT

Rank Tracker is my go-to tool for (duh...) rank tracking and client reporting. The tool is not as intuitive or good-looking as for example Semrush, but it is very powerful and straightforward.

Features

- Unlimited projects
- Unlimited search engines
- Unlimited keywords
- Unlimited number of search results (50 – 1000 e.g.)
- Ranking without SERP-packages, if you prefer
- Local search options
- Scheduled searches
- Extensive keyword analysis
- Custom ranking reports

I use it all the time for my own websites and also to give my clients detailed overviews of how their ranking is progressing.

And finally: Rank Tracker is great value for money compared to many of the other SEO suites out there.

Rank Checking Mode

Here you can configure which methods of search you use and how many search engine results you check. Sometimes it's wise not to go beyond top 100 results - mainly because Google/Yahoo/Bing (or other search engine) users seldom check websites which rank lower than top 100.

Maximum number of results to check:

Please specify the max number of results Rank Tracker should check. The maximum number you can specify here is 1,000. This is the maximum any search engine will return.

☒ **Track organic results only**

Disable this option to include SERP Features into results (Videos, Images, Local Packs, News, Shopping etc.).

☐ **Track multiple results for keyword**

This option lets you see how different site's pages rank for one and the same keyword in search engines. If you leave the checkbox unmarked, Rank Tracker will only find one best ranking result for each keyword.

☐ **Record SERP history**

When checking your rankings for a keyword, Rank Tracker will also keep history record of the top 30 pages that rank for this keyword on this date.

Method of searching for rankings: Successive Search

The Successive Search method lets you search for your pages' rankings going from one search engine results page to the next. This is an accurate method but it can require too many queries if your sites don't rank on the first pages of search engines.

☒ **Let Google auto-correct keywords**

If Google considers that a keyword you've entered to the search field has been misspelled, there'll be a link on top of search results (Search instead for...). Rank Tracker can follow this link and check your rankings in search results for the corrected

THE HOTH is a productivity secret that I stumbled upon. I have loads of websites and run an SEO-agency. This means that I need to improve the backlink profile of a lot of sites...

What that boils down to was a bunch of manual labor. E.g.

- make infographics
- find high DA-websites in your niche
- write guest posts
- research (spy) competitors
- outreach to webmasters

That would cost me weeks to get it done with poor results.

Then a SEO-colleague of mine told me about THE HOTH which is an agency that specializes in backlinks and more.

These guys will save you huge amounts of time while in the meantime creating nice and solid white-hat backlinks.

Brilliant!

THANKS...

...for reading my personal Productivity Secrets Guide!!

If you made it up till here, you must have enjoyed this guide. I know I did while writing it. Because these tools help me to get my things done as well.

This guide was in fact made by using 29 of these tools!

To be fully transparent: this book contains affiliate links to some of the tools I have described. This means I could receive a commission from sales of certain paid items.

This is at no extra cost to you. On the contrary. Many times you will benefit from using my links, because they will give you extra discounts or bonuses.

My process has been like this: I have used and tested a lot of tools myself over the past decades. So, there are many more tools I have tried than described in this guide, among which of course also a lot of competitors of the tools listed. But if they were not up to my standards, they didn't make the "cut".

I only promote tools that I use and would recommend to you passionately.

Because I know they will help you do more in less time and with less effort.

Which in turn will make you become more successful and happier in your work and private life.

So you don't have to spend 12 hours per day...

See you around.

Olaf

Olaf van Gessel weet precies hoe Zoran moet worden aangepakt Broers hockeyen voor het eerst tegen elkaar

(Door Frank Kalis)
AMSTERDAM — Jarenlang zaten ze bij elkaar op de brommer tussen Doorn en Bithoven, waar Zoran van Gessel (22) en zijn een jaar jongere broer Olaf hockeyden bij SCHC. De laatste jaren pendelden ze van hun woonboot aan de Nieuwe Keizersgracht in Amsterdam naar de Kees Boekelaan. Een beeld dat dit seizoen is veranderd. Zoran stapte over naar Kampong, terwijl Olaf SCHC trouw bleef. Verschillende trainingstijden laten gezamenlijk reizen niet meer toe, maar zondag zitten ze voor een keer weer bij elkaar in de auto.

Op weg naar hetzelfde sportpark, want SCHC speelt op die dag de streekderby tegen rivaal Kampong. Voor het eerst in hun leven komen Zoran en Olaf van Gessel dan in competitieverband tegen elkaar uit. Uniek is dat niet, want Jacky Brinkman en Richard Brinkman, nu beiden spelend in Utrecht, gingen het duo bij SCHC voor.

„Ik heb nog nooit tegen Zoran gespeeld, dus ik weet eigenlijk niet wat ik me daarbij moet voorstellen”, zegt Olaf van Gessel, die laatste verdediger is bij SCHC. „Ik hou ook niet van zo'n opgefokte sfeer vooraf. Ik denk dat ik me pas na de wedstrijd realiseer dat ik tegen mijn broer gespeeld heb. Trouwens, ik kom hem in het veld toch niet tegen. Want zover komt hij niet”.

Zoran van Gessel, de laatste wedstrijden bij Kampong op de linksmiddenplaats, maakt zich er ook niet zo druk om. „Natuurlijk is het iets speciaals als je tegen je broer speelt, maar in principe speel ik tegen mijn vorige club. Ik herinner me trouwens nog het jaar dat Jacky en Richard tegen elkaar speelden. Letterlijk dan. Ze stonden ook in het veld tegenover elkaar. Dat is dan toch net iets anders, denk ik”.

Zoran en Olaf hebben tot vorig seizoen altijd in hetzelfde elftal gestaan. Vader Van Gessel, een van de mensen van het eerste uur bij HC Doorn, sleepte zijn zoons mee naar het Doornse veld. De club had talentvolle spelers in huis, zo bleek. Omdat

kenden uit de nationale selecties. Kampong viel af, omdat het geen sterke jeugd had en moeilijker bereikbaar was vanuit Doorn”.

Enkele jaren later, toen van 20 kilometer naar de Kees Boekelaan, mie gingen studeert. Zoran bleef een jaar bij SCHC afgevoerd. Zoran schrikt door de mededeling van Zoran van Gessel dat hij naar

dat zijn jongere broer Olaf mee zou gaan. Zijn naam was al uit het ledenregister afgevoerd. Hij moet nu in Bithoven blijven.

Natuurlijk had Zoran ook nog een broer, maar die was al naar Doorn verhuisd. Als Zoran iets in zijn hoofd heeft, brengt hij het naar

goals van de hoofdklasse maakt. Het veldspel is beter dan vorig jaar. Dat is zeker de verdienste van Rob Bianchi. Hij straalt van nature autoriteit uit, dat hebben we nodig”.

Ook Kampong draait niet optimaal. Een slechte start, waarin de ploeg zoekende was naar de juiste samenstelling. Pas de laatste wedstrijden kwamen de punten binnen. Zoran begon bij Kampong op de van SCHC vertrouwde rechtsachterplaats, maar inmiddels staat hij links-midden. „Kampong wilde bouwen op een sterke verdediging, maar het liep in de andere lijnen niet. De voorbereiding was ook niet optimaal omdat Tom van 't Hek en Jacky Brinkman er pas laat bijkwamen. Het is met die twee toch anders spelen. Zij zetten de lijnen uit. Ik denk dat het evenwicht nu gevonden is. Ik wilde zelf altijd graag op het middenveld staan. Daar sta ik nu. Het gaat de laatste wedstrijden lekker”.

Waar SCHC zich richt op behoud, hoopt Kampong nog op een plaats bij de eerste zes. Het maakt, behalve dat Zoran en Olaf tegen elkaar spelen, de streekderby zondag extra beladen. Zelf zijn ze nog niet echt met de wedstrijd bezig hoewel ze elkaar dagelijks op hun gezellige woonboot in de Amsterdamse gracht tegenkomen. Geheimen voor elkaar hebben ze niet. Van een koude oorlog is geenszins sprake. „De wedstrijd gaat pas zondag voor me spelen”, zegt Zoran. „Geheimzinnig hoef ik niet te doen. We weten alles van elkaar. De ploegen kennen elkaar door en door”.

Volgens Olaf van Gessel, die als laatste man geen directe tegenstander zal hebben, is Zoran in het voordeel omdat hij bij SCHC heeft gespeeld. „Hij kent alle jongens erg goed. Hij zal zeker een ander over ons verteld hebben. Maar wij weten ook voldoende over Kampong. De nadruk ligt bij de uitschakeling van Jacky Brinkman en Tom van 't Hek. En Zoran? Ja, ik weet hoe je Zoran moet aanpakken. Hoe? Nou door hem de bal niet te laten aanraken. Als je dat

risentito; a due giornate dal
termine il primo posto che
porta in A1 dista quattro pun-

analisi Biasetton-, comunque
vada, per noi, a fine torneo ci
sar  tempo per sorridere e fe-
steggiare. L'importante   far
aumentare di anno in anno il
movimento, che   poi anche il
nostro obiettivo principale.
Per essere promossi c'  tem-

fronto con Villarperosa (vinto
5-1) e con la capolista Bra
(perso 6-3) e proiettato verso
una nuova trasferta a Bra, que-
sta domenica, il Betongamma
ha sposato di recente anche la
linea verde. Gi  inseriti il di-
ciottenne portiere Flavio Ca-
sali (nazionale under 21) e i
due baby Marco Grechi e Mi-
chele Montalbano (rappresen-
tativa under 18), si punta a far
crescere altri potenziali talenti

accanto al capitano Giulio
Colpani (uno dei pi  continui
e autentici collante nello
spogliatoio) e al centravanti
Olaf Van Gessel, unico pro-
fessionista. "Il mio lavoro
chiosa Biasetton-   sempre
stato agevolato dall'omoge-
neit  di questo gruppo. Ra-
gazzi unici, anche se
quest'anno dal punto di vista
tattico abbiamo impiegato un
p  troppo a digerire il cam-
bio di difesa. Siamo passati
ai quattro uomini in linea e
con questa disposizione qual-
cosa agli attaccanti avversari
va pure concesso, almeno il
primo anno." Dopo la trasfe-
ra di Bra, il 30 giugno caler 
il sipario con il match raso-
lingo contro il Mori. C'  an-
cora un secondo passo da
conquistare e, bissando il ri-
sultato della scorsa stagione,
pur guadagnando l'amara
piazza d'onore, nessuno si
sentirebbe un perdente.
